

Toyota LC200 Series Smart Caravan/Trailer Camera Integration

1383-1

Features

- Plug and Play installation.
- Automatic Video Sensing system switches to the caravan camera image when the caravan is connected to the vehicle.
- No external switches required*.
- Use your factory display as a rear view mirror while driving forwards without affecting the sound from the factory audio system.
- Activation while driving forwards with a long press of the NAV button.
- Only compatible with NTSC cameras.
- 2 Year Warranty.

*except if adding a Front Camera (switches not included)

Overview

The Landcruiser has always been a very popular tow vehicle and the latest models come with a high resolution display. So it makes sense to utilise this screen to view a caravan camera image rather than add unsightly additional displays to the dash.

For the LC200 Series VX & Sahara running the Surround View Camera System we can offer a premium caravan/trailer camera system that seamlessly integrates up to two (2) cameras to the factory screen. The system includes a video sensing module that automatically changes to the caravan camera picture when the caravan is hooked up to the vehicle and reverse gear is engaged. As soon as the caravan camera is disconnected the factory reverse camera displays as normal, so there is no need for any external switches.

You can even activate the caravan camera image while driving forward without interrupting the audio from the cars sound system. All you need to do is long press the factory NAV button and the camera image will display, just like a rear view mirror.

Compatibility

Compatible with the following Vehicles:

- Landcruiser 200 Series Sahara with 9 Inch Screen and Surround View Camera System (from August 2018)
- Landcruiser 200 Series VX with 9 Inch Screen and Surround View Camera System (from August 2018)

Notes

- If you have a Sahara model (built before August 2018) that has the 9 Inch Screen but still with the Surround View Camera System, please see part number [1259-1](#).
- If you have a VX model (built before August 2018) that has the 9 Inch Screen with a Reverse Camera only, please see part number [1259-2](#).
- Only compatible with cameras that run NTSC video signal. If you have a camera existing on your caravan/trailer, please check it is NTSC before ordering.
